## SEMINARIO

**Francesca Greselin y Giorgia Zaccaria**

*Universidad de Milano-Bicocca*

***Statistical methods for clustering and  
measuring inequalities***

**Abstract:** Different statistical methodologies for clustering and measuring inequalities will be presented. In particular, novel model-based clustering approaches based on ultrametric models for hierarchical dimensionality reduction will be considered. Statistical approaches for measuring inequalities will also be reviewed, along with some applications to measure income inequality and the gender gap.

**Seminario Dpto. de Estadística e I.O., Facultad de Ciencias  
Jueves 23 de Noviembre de 2023 (13:00)**

**Organiza: G.I.R. PEM**
